

Dresden Comprehensive Plan Vision Statement

With this Comprehensive Plan, the Town of Dresden hopes to preserve and protect the rural character, quality of life, natural, agricultural, water and forest resources, and private landowner rights in our town.

The Dresden Comprehensive Plan is an advisory document that will serve as a guide to the elected and appointed Town officials in their future land use decisions. It is an expression of the townspeople's vision of its future, as a result of the recently conducted survey, and will serve as a source of basic information about the natural and man-made environment of Dresden. Well-planned and managed development will let the Town grow while retaining its rural setting.

This vision is not a list of actions to be avoided, but a positive design to be achieved with community involvement and well-considered local land use decisions. It can be maintained and improved upon over the long term.
